Setting the Stage for Common Measures: Reflections on JCOIN 1.0 and Early Thoughts

Data Flow and Setting Expectations

- We expect data to be submitted to the MAARC routinely
- We will monitor recruitment very closely and will likely recruit the MAARC and/or CTC to assist with preparing monthly reports
- Data must be archived and shared to the extent possible
- We encourage collaborative and cross-hub projects early & often

Core Measures: Where to Start

- **Purpose of Core Measures**:
  - Allow comparisons across studies
  - Facilitate secondary data use, including powering questions that can only be addressed with pooled data (e.g., low base rates)
- **Task:** Define parameters of what makes sense for JCOIN 2.0 CDEs
  - Segmented by Intercept Point?
- **Don't reinvent the wheel** – start with the currently established measures and determine what needs to be adjusted

Core Measures/CDEs – Getting More Granular

For Self-Report, Survey, or Coded Data, Think About Level of Measurement

- Clinical Outcomes
  - Individual Participant
- Organizational Outcomes/Context
  - Staff
  - Leadership
  - Implementation
- Administrative Data
  - Anything that could be coded/abstracted consistently?

Choosing CDEs

- We will chart the course for CDEs together – our approach will be pragmatic, but also pushing to maximize scientific synergies

- **Next steps:**
  - In the **next month**, each study intercept group should meet at least once to have a starting point discussion
    - Review existing CDE sets
    - Discuss what is practical & what is missing
  - **Do this even if we are unavailable to join**
  - **Need co-chairs** for each intercept point – R01 + RM1/UM1 co-chairs
  - Also need a group to discuss **implementation science** common measures

- **Goal:** Finalize CDE guidance for network within first 3-4 months

JCOIN 2.0 Hubs:
Looking for CDE Co-Chair Volunteers

R01s
DelPozo – Police Led Diversion
Smiley-McDonald – Deflection Model

UM1
Becan – Deflection/Diversion Implementation Strategies
Brinkley-Rubinstein – Community Paramedics + CLS

R01s
Pivovarova – Drug Courts/Tx Providers
Ray – Peer Navigators-County Courts
Rouhani -Drug Court Fees

UM1
Saldana – Child Welfare

Intercepts 0/1
Community & Law Enforcement

Intercepts 2/3
Courts

Intercepts 3/4/5
Jails & Re-Entry

Intercepts 3/4/5
Prisons

R01s
Carpenter – Peer Recovery Telehealth
Smelson – Assertive Case Mgmt/Lnkg

UM1
Evans – 1115 Waiver Implementation
Martin – ECHO for MOUD Scale Up
Dennis – Recovery Mgmt Scale Up
Staton – Recovery Coaching & Support Persons
Blue – MOUD Preference – Rural Jails
Lee – MOUD CER at ReEntry

R01s
Jack – OUD Screening & Nurse-Led Shared Decision Making
Bandara – Hospital/Clinical Designation and Methadone Dispensing

UM1
Molfenter – MOUD Scale Up Strategies
