

Equity, Diversity, and Inclusion (EDI)

The EDI and Dissemination sections ask about your planned efforts; this can be updated and refined as needed as you get further into the work.

How are diverse stakeholders actively included and involved in the research process or product development?

Diverse stakeholders: individuals from different backgrounds, including but not limited to race, ethnicity, gender, sexual orientation, ability, age, and socioeconomic status

How are diverse perspectives, knowledge systems, and lived experiences of stakeholders integrated into the analysis or interpretation of the work?

Diverse perspectives: different viewpoints, ideas, and experiences based on various social identities;

Knowledge systems: culturally specific ways of knowing and understanding

Are there other ways that Equity, Diversity, and Inclusion are integrated into this work?

For example, by addressing systemic inequities or power imbalances that may impact the research findings or outcomes, or by ensuring equitable access to research opportunities, resources, and benefits for underrepresented groups.

Systemic inequities: the unequal distribution of resources, opportunities, and privileges based on social identities

Power imbalances: imbalances of power and influence that can marginalize certain groups

Underrepresented groups: individuals who have historically been marginalized or have limited representation within a given context, such as racial or ethnic minorities, individuals with disabilities, or individuals from low-income backgrounds

Dissemination

Research dissemination: the process of sharing research findings with relevant stakeholders and the broader community

How would you describe the intended audience of this product/publication?

What are your initial ideas about how to disseminate/translate this?

How can you reach diverse audiences and effectively communicate the implications?
(Consider how you would adapt the product for each intended audience)
