Research Translations

Translating the latest research is a key component of improving implementation of effective policies, practices, and interventions into practice. The JCOIN CTC breaks down the latest research and science around substance use disorders and related issues within health and justice settings for research and practitioner audiences.

JCOIN 1.0 Study Pages

JCOIN supports researchers working in partnership with criminal legal system and behavioral health treatment professionals to build the evidence base for effective SUD service delivery, implementation, and dissemination. Each JCOIN study addresses a specific gap in the SUD care cascade, at one or more intercept points including jails, prisons, community corrections, problem-solving courts, and juvenile justice agencies. The studies evaluate the effectiveness and/or implementation of behavioral interventions, digital therapeutics, comprehensive patient-centered treatments, and medications for opioid use disorder (MOUD) in communities throughout the United States.

JCOIN Resources

Cascade of Care Toolkit

The Cascade of Care Toolkit helps you measure, estimate, and improve access to substance use disorder treatment in your community, with data-driven insights at every stage, from assessment and referral to completion. Free to use, flexible, and designed for actionable planning across any population.

CONNECT

CONNECT is a researcher and practitioner collaboration and discovery tool developed by the Justice Community Overdose Innovation Network (JCOIN). CONNECT aims to help facilitate multidisciplinary research and programmatic collaboration across the health and justice fields

Core Measures

A resource for measures used in JCOIN clinical trials, staff surveys, and public opinion surveys regarding criminal justice experience, substance use, and related domains.

DyCep – Available January 2026!

NIATx DyCEP was developed to provide correctional and behavioral health settings like yours with all the necessary tools to create measurable and scalable process improvements in a timely and efficient way while you work with your personal NIATx coach.

MAT/MOUD Budget Impact Tool for Jails/Prisons

An easy-to-use tool (Excel) that helps jail/prison personnel estimate the costs of starting, expanding, or maintaining a program to provide medications for opioid use disorder (MOUD, aka MAT).

JCOIN Rapid Innovation Grants (J-RIG)

The JCOIN CTC administers the JCOIN Rapid Innovation Grant (J-RIG) program, a swift funding mechanism designed to support innovative research projects aimed at tackling addiction within criminal legal involved populations. Explore J-RIG to turn your research ideas into impactful solutions.

Learning Experiences to Advance Practice (LEAP)

Learning Experiences to Advance Practice (LEAP) is a multifaceted program designed to educate any interested individual about the nuances of conducting research in criminal legal settings.

By educating key partners about effective and thoughtful conduct of research, we hope to build capacity for this research in the criminal legal and health fields, which is sorely needed.

LEAP will increase the speed with which science becomes practice. The program offers research education, mentoring, networking, and other resources to benefit practitioners, researchers, analysts, and interested community members working within or researching the criminal legal and/or health systems.

JCOIN Training & Technical Assistance (TTA)

Free technical assistance is available from the CTC and the MAARC to improve access to substance use disorder treatment for justice-involved individuals and to enhance the quality and impact of JCOIN research.

CTC Support: Training, TA, and Implementation Help

The CTC offers technical assistance (TA) to interested parties to expand knowledge and advance service delivery. CTC TA covers topics like implementing evidence-based practices (e.g., medication for opioid use disorder), developing grant proposals, overdose prevention and reversal, and more. Our personalized TA includes virtual training, customized assistance or assessment, consultation, informational resources, and peer-to-peer interactions.

MAARC Support: Analytics, Data Access, and Methods

The Methodology and Advanced Analytics Resource Center (MAARC) provides analytic and data support for JCOIN. MAARC offers on-demand technical assistance (TA) to JCOIN members and the broader community of researchers and stakeholders. The main areas of MAARC TA include JCOIN data access and methodologic questions related to study design and advanced quantitative and qualitative analytics. MAARC provides expert consultations and customized TA based on needs assessment.

JCOIN Training & Engagement Center (J-TEC)

A free education platform for criminal legal and health professionals.

Courses

Join researchers and experts like Dr. David Farabee, as well as people with lived experience in the justice and health systems, to take a deep dive into topics that are relevant to people in who work in or are impacted by the justice and health fields.

Webinars

JCOIN hosts a number of webinars on topics relevant to the justice and health fields. These educational webinars last approximately 90 minutes and are available shortly after they take place, so you know you are getting up-to-date information.

Quick Lessons

Quick lessons can typically be finished in under an hour (sometimes much less!) and cover practical topics that are useful to the field.

Podcasts

The Aced It podcast is the place to go if you're trying to find out what's new in the health and justice research world, but don't have the time, energy, or know-how to decipher all that academic writing.

JCOIN Grantee Portal

This Portal provides information, updates, and useful resources for JCOIN Grantees.

Grantee Calendar

Keep up to date with JCOIN activities and important events in the health, justice, and social work fields. This calendar will track important JCOIN events and provide information about conferences, webinars, and crucial dates, such as J-RIG and LEAP application deadlines.
