ABOUT JTEC & A BIG “THANK YOU”

In Response to a Pandemic

The Justice Community Opioid Innovation Network (JCOIN) Coordination and Translation Center (CTC), led by Dr. Faye S. Taxman of George Mason University and Dr. Danielle S. Rudes of Sam Houston State University, is a cooperative of organizations that conducts research, engages stakeholders, disseminates findings, and provides support and infrastructure to JCOIN.

The CTC first developed the JCOIN Training & Engagement Center (JTEC) as part of the CTC website to provide pandemic-friendly learning resources for a variety of audiences.

As of Spring 2024, JTEC hosts over 60 courses, more than 30 recorded webinars, 8 quick lessons, and over 70 podcast episodes.

JTEC’s reach extends far beyond JCOIN. Our partners distribute the courses throughout their extensive networks to those who will benefit from the material, such as law enforcement, judges, people working in behavioral health, and families impacted by addiction.

Some organizations have incorporated our courses in hybrid trainings, and JTEC courses and the Aced It podcast have been used in educational curricula from middle school to graduate school.

The CTC gratefully acknowledges the support of the National Institute on Drug Abuse (NIDA) and the many people in the JCOIN community who have developed or contributed to these courses.

Thank you from all of the CTC agencies and organizations!

JCOIN PROVIDES FREE TRAINING & TECHNICAL ASSISTANCE (TTA) TO IMPROVE ACCESS TO TREATMENT AND FACILITATE PARTNERSHIPS

jcoinctc.org/tta

A KEY TO JTEC'S SUCCESS ARE OUR PARTNERSHIPS

ASSOCIATION

Key to the success of JTEC is our partnerships with many organizations that work directly with health and justice practitioners, policymakers, and people with lived experience. We acknowledge the organizations that co-developed courses alongside Addiction Policy Forum.

Lessons on the stigma around substance use disorder, stigma research and interventions to reduce stigma, stigma research in criminal legal settings, and the impact of language. Speakers include NIDA Director Dr. Nora Volkow, Dr. Valerie Earnshaw, Dr. Ben Howell, and Jessica Hulsey.

Lessons on implementing medications for addiction treatment in jails, prisons, and reentry settings; FDA-approved medications for opioid use disorder; the cascade of care framework; and practical applications. Speakers include Dr. Peter Friedmann, Dr. Arthur Robin Williams, and John Wetzel.

ON COURSES

HAVE A GREAT IDEA FOR A COURSE?
PARTNER WITH US!

JCOINCTC.ORG/CONTACT

Fentanyl Facts and Overdose Risk

Facts about fentanyl in the U.S., impact on overdose risk, and resources for communities. Featured speakers include Dr. Wilson Compton, Sean Fearnis, David Tarantino, and Brandon del Pozo.

Lessons on overdose risk and medication efficacy, substance use disorder treatment and medications to treat opioid use disorder, and MOUD patient experiences. Featured presenters include Dr. Sarah Vinson, Dr. Brian Fuehrlein, Dr. James Berry, and Dr. Mark Gold.

Implementing Evidence-Informed Practices for Opioid Use Disorder

What policymakers need to know about OUD, effective practices, considerations relevant to the jurisdiction level, and how to request TTA.

Reentry Best Practices

Lessons on reentry best practices for individuals with substance use disorders, screening and assessments, evidence-based treatments, and reentry planning. Speakers include Chief Justice Loretta Rush, Drs. Tisha Wiley and Wilson Compton, Dr. Tyler Winkelman, Dr. Nicole Avena, Dr. Faye Taxman, Drs. Sharon Walsh, Michelle Lofwall, Carrie Oser, and Sarah Wurzburg.

LEARNING EXPERIENCES TO ADVANCE PRACTICE (LEAP)

LEAP

LEAP is a multifaceted program designed to educate any interested individual about the nuances of conducting research in criminal legal settings. LEAP Learner courses were developed by experts in the field, including Drs. Greg Aarons, Jennifer Becan, Faye Taxman, David Farrabee, Angela Hattery, and more.

COURSE SERIES

PROFESSIO

Wellbeing & Equity Innovations developed for JTEC two series of courses related to professional peers working in criminal legal settings: a series for people who work as or are interested in becoming professional peers and a series for other system professionals (system actors) who work with professional peers. These series cover multiple settings, including drug courts, incarceration, community corrections, and more.

Series creators: Dr. Carrie Pettus and Jennifer Joseph (Wellbeing & Equity Innovations); Nancy McCarthy; Justice System Partners; Slonky, LLC

EMPOWERING CHANGE THROUGH JCOIN EQUITY, DIVERSITY, AND INCLUSION (JEDI)

Join us in our mission to leverage differences, promote belonging, and create positive outcomes for all individuals with opioid use disorder who are involved in the carceral system.

Mapping EDI Progress

Through informative tables, we present major themes such as

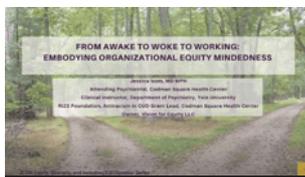

- advancing hiring efforts,
- engaging individuals with lived and living experience, and
- EDI-driven data analysis and dissemination.

Discover the goals of each JCOIN hub in these areas, as well as ongoing efforts that underline the hubs' commitment to fostering inclusivity and driving positive change throughout JCOIN.

RESEARCH TRANSLATION

Translating the latest research is a key component of improving implementation of effective policies, practices, and interventions into practice. The JCOIN CTC breaks down the latest research and science around substance use disorders and related issues within health and justice settings for research and practitioner audiences. Scan the QR codes for each article to view the full text.

Barriers and Facilitators Within Opioid Intervention Courts That Impact Substance Use Disorder Treatment

Findings From JCOIN’s New York State Psychiatric Institute (NYSPI)/Columbia University Clinical Research Center

To address the high rates of opioid use disorder (OUD) and overdose among individuals involved in the court system, New York developed the Opioid Intervention Court (OIC), a novel pre-plea court model that specifically addresses OUD by providing rapid screening and connections to community-based treatment within 24 hours of arrest.

OIC diverts participants at arraignment and temporarily pauses prosecution to allow the individuals to initiate treatment. The model was designed to reduce wait times and improve referral and linkages to evidence-based treatment services (e.g., medications for OUD [MOUD], cognitive behavioral therapy [CBT]), specialized peer support, intensive case management, and etc...

New Report Features 10 Best Practices for Jails and Prisons when Responding to Opioid Use Disorder

 Opioid Use Disorder Best Practices for Corrections highlights 10 essential strategies that jails and prisons can use to address the treatment needs of individuals with opioid use disorders (OUD) and those involved with the criminal legal system. It includes actionable resources for policymakers, corrections officials, and key stakeholders to improve OUD practices and policies in correctional settings...

Study Identifies Key Indicators of Stigma Toward Individuals Who Use Methamphetamines

Findings From JCOIN’s Methodology and Advanced Analytics Resource Center (MAARC)

A study recently published in Preventive Medicine Reports by researchers at the University of Chicago and NORC identified several factors associated with higher stigma towards individuals who use methamphetamines.

Six variables were significantly associated with higher stigma: older age, higher household income, married status...

7 Best Practices for Using MOUD Across the Cascade of Care in Criminal Legal Settings

Findings From JCOIN’s Coordination and Translation Center (CTC)

 The growing rates of substance use and overdose deaths have significantly impacted the U.S. criminal legal system. Almost half of individuals in federal facilities (Mumola & Karberg, 2006), 58% in state facilities, and 63% in county jails (Bronson, 2017) have a substance use disorder. Despite the high prevalence rates, very few individuals receive evidence-based treatment, such as medications for opioid use disorder (MOUD). Providing MOUD during incarceration and during reentry has shown to reduce overdose deaths (Degenhardt et al., 2024) and recidivism (Evans et al., 2022), and increase treatment engagement, retention, and health outcomes (National Academies of Sciences, 2019).

Utilizing a public health framework...

New Study on Stigmatizing Imagery for Substance Use Disorders Released

Findings From Addiction Policy Forum (APF), a JCOIN CTC Partner Organization

A new Addiction Policy Forum-led study explores stigmatizing and non-stigmatizing imagery for substance use disorders (SUD) and criminal justice contact.

Non-stigmatizing imagery

The qualitative study of people with lived experience with SUD identified stigmatizing images of substance use and criminal justice settings, along with alternative images to utilize. Researchers found that certain images were identified by individuals as not only stigmatizing but triggering, making individuals reactive and think of using again (i.e., relapse).

The results are published in the latest edition of the journal *Health & Justice*.

“Stigma is a major barrier to treatment and recovery for individuals with SUD, with intersecting stigma experiences for those who are also justice-involved,” explained Jessica Hulsey, the study’s lead author and the executive director of the Addiction Policy Forum. “Much of the imagery currently used to depict addiction in the news, social media, television and in publications can be both triggering and stigmatizing for those in recovery from SUD. We hope the findings can be helpful in informing the selection of less harmful imagery to represent substance use disorders.”

About Aced It

Meet the Host

Danielle S. Rudes, PhD is a professor of criminal justice & criminology at Sam Houston State University and the deputy director of the Center for Advancing Correctional Excellence (ACE!) at George Mason University. She received her BA in mass communication (broadcasting) from the State University of New York at Plattsburgh, her M.A. in Communications from the University of New Orleans, and an MA and PhD in Sociology from the University of California, Irvine. Dr. Rudes is an expert qualitative researcher whose methods include ethnographic observation, interviews, and focus groups, with over 20 years of experience working with corrections agencies at the federal, state, and local county levels including, prisons, jails, probation/parole agencies, and problem-solving courts. She is recognized for her work examining how social control organizations and their middle management and street-level workers understand, negotiate, and at times, resist change.

Meet the Quick Lesson Creators

Quick Lessons are created by **Becky Baltich Nelson** (education and clinical librarian, University of Massachusetts Chan Medical School) and **Sally Gore** (research and scholarly communications librarian, University of Massachusetts Chan Medical School).

"The information was presented in a clear and concise manner. I did not become bored with the instruction as I usually do with long courses. I actually learned a lot from this information, small things like word usage and image usage. I identified several problems with my website, thanks to this. I also identified in my own life, how I might be triggering myself, simply with the way I explain my situation."

CHECK OUT THE NEW JTEC!

The Justice Community Opioid Innovation Network (JCOIN) re-visions how the justice system responds to addiction. The JCOIN Coordination and Translation Center (CTC) (PI: Faye Taxman, PhD, George Mason University) supports this crucial initiative through engaging with key stakeholders, disseminating products and findings, and providing infrastructure.

JCOIN is funded through the Helping to End Addiction Long-termSM Initiative, or NIH HEAL InitiativeSM. The NIH HEAL InitiativeSM is an aggressive, trans-NIH effort to speed scientific solutions to the national opioid health crisis. Launched in April 2018, the initiative is focused on improving prevention and treatment strategies for opioid misuse and addiction and enhancing pain management. For more information, visit: <https://heal.nih.gov>.
